

1) Multilevel Drop Down Navigation Menu

We can start off with something like http://www.stunicholls.com/menu/pro_dropdown_2.html. I have formatted sublevel menu items under BODY TYPES (3rd item from right) in this example: <http://newsite.fx4boutique.com/>

Product categories are set in "category" column in the inventory.

2) Banner space

3) Log in / sign up
Will be taken to "login.psd".

4) Shopping cart symbol

5) Total amount in the Shopping Cart

6) Currency Conversion

USD (United States Dollars)
CAD (Canada Dollars)
EUR (Euro)
GBP (United Kingdom Pounds)
AED (United Arab Emirates Dirhams)
BRL (Brazil Reals)

7) Font family

Century Gothic will be used for texts. The CSS must go:
"font-family: 'Century Gothic', Futura, 'URW Gothic L', sans-serif,"

9) Email subscription

Pressing SUBSCRIBE will take you to "email.psd", and the user's email address input will carry over so that they don't have to type in again.

8) Footer menu

A static menu is fine. Please make sure it's centered instead of left-aligned.

1) Bread crumb menu
When this page is a product search result, search keyword has to be bold: "Home > Search Results for **keyword**".
